

RESEARCH DONE RIGHT

CONTENTS

Introduction	i
A. How A Successful Project Come Together	1
1. Development Process	3
2. Multi-Functional Product Development Teams	5
3. How Project Planning Works	8
4. Decisions Teams and Stage Gates	13
5. Product Development Work Process	17
B. What External Requirements Does Your Product Need to Meet?	19
6. How to Determine What's Driving Your Customers' Need for Your Product	21
7. How to Determine Your Customer's Product Requirements	26
8. How to Determine the Size of the Opportunity	30
9. Why Getting Multiple Inputs Is Important	35
10. How to Determine Competitive Alternatives	39
11. How Customers Measure Cost	42
12. What Is the Timing for the Decision?	44
C. What Internal Requirements Does Your Product Need to Meet?	47
13. What Are the Commercial Department Needs?	49
14. How to Address the Needs of Production and Shipping	51
15. What Requirements Does Research Have?	56
16. What Are the Safety, Environmental, Ethical, Societal, and Legal Requirements?	58
D. How Do You Effectively Get Your Solution Developed and Produced?	61
17. How to Get Started and Go Faster	63
18. How to Use Other Non-Research Factors to Speed Research	68
19. How to Get Ad-Hoc Member Participation	71
20. How to Protect What You Have Developed	72
21. How to Stay Motivated	75
22. Using Marketplace Demand to Focus Development	78
23. Internal Cash Flow and the Importance of Speed to Market	81
24. How to Stay Focused to Go Faster	84
E. How to Determine Product Viability	87
25. How Customer Value Is Extracted	89
26. How to Reduce the Cost Side of the Equation	92
27. Skill Sets Needed By Researchers	95
28. Line Extension Products	97
29. New-to-the-World Products	100
